

BIT Solution ? Ontario fleet checklist

This is an internal discussion list for commercial fleets.
It is not an official MTO form and it is not a certification.

Yard and road

- ☐ Dispatch, shop, and hours live in one place a person can trust
- ☐ Live unit location is visible without a group chat
- ☐ After-hours reefer or door alarms reach a person, not voicemail

Hardware

- ☐ Yard cameras cover the gate and the shop door
- ☐ Tracking devices are named, tested, and replaced when they die
- ☐ Dispatch machines are not leftover home laptops
- ☐ A private server holds the day if the cloud path fails

Access

- ☐ Driver files and bills of lading are not on guest wifi
- ☐ Guest and shop networks are split
- ☐ We can say who opened the gate and when

Ontario note

Confirm current MTO, CVOR, and hours-of-service duties with your compliance advisor. BIT Solution can sit with you on the stack.
