

BIT Solution ? Dental PHIPA self-audit

A practice discussion guide for Ontario dental offices.

Not a PHIPA certification, not legal advice, not a clinical claim.

Records and access

- ☐ Charts are not on the waiting-room wifi
- ☐ Each role has its own login ? no shared front-desk password
- ☐ We can say who opened a record and when
- ☐ Departed staff lose access the same day

Floor and machines

- ☐ Chair and desk systems agree on the patient in the chair
- ☐ Imaging and backups land on a private server you control
- ☐ Cameras cover the door you care about ? not a forgotten hall
- ☐ After-hours patient or equipment alerts reach a person

Vendors

- ☐ Guest wifi cannot see charts or card terminals
- ☐ Vendor laptops do not sit on the same net as records
- ☐ Written list of who can take a backup off site

Ontario note

PHIPA duties sit with the health information custodian.

Use this list with your privacy officer or counsel. BIT Solution can help with the stack ? we do not replace legal advice.
